

Climeworks Online Services Fact Sheet

Pioneering tangible carbon solutions since 2009

Climeworks offers standardized Carbon Removal Portfolios based on scientific guidance.

Portfolios consist of different carbon removal credits, representing the removal of a specified quantity of carbon dioxide from the air.

How the portfolios work

Credits are sourced from (i) Climeworks' own direct air capture facilities and (ii) projects from third-party carbon removal suppliers utilizing various technology and nature-based carbon removal solutions, vetted for highest quality within their domain.

At the time of purchase, customers receive an order confirmation, invoice and can track their orders from the [Climeworks dashboard](#).

Deliveries take place within 7 years following the year of purchase.

Upon delivery, customers will receive a delivery note specifying the details including supplier information.

Nature focus

Most affordable: 100 USD/ton

Nature and Technology

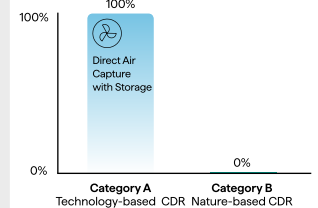

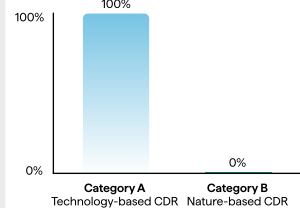

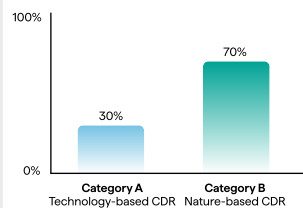

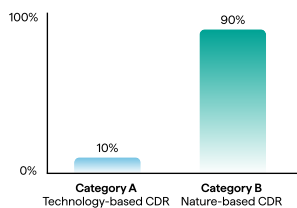

Well-rounded: 250 USD/ton

Technology focus
